Nursing Registries can help their Patients keep their Independence at home while remaining in Compliance

“TAKE THE COMPLICATION OUT OF MEDICATION”

People are taking more prescription drugs which provide a potential for mistakes in self dosing.

“About half of people who use prescription drugs are not taking them correctly”

- Homecare Oct. 2013

THERE IS AN EASY AND SAFE SOLUTION

A convenient medication packaging system

Dispill is an innovative and patented multi-dose packaging system that makes it easy to take your medication. Each Dispill blister pack contains 28 individual blisters that contain your prescribed medication for a specific time (morning, noon, evening, bedtime) and date.

When a blister for a specific time is empty, then you know you have taken your medication. Carrying your Dispill blister pack lets you and all health specialists know about the medication you are taking.

Certified Nursing Assistants and Home Health Aides are Prohibited from Administrating Medication.
